

What do we do?

We help you create and adopt innovative technology solutions for learning and assessments. Over the last 3 years, we've worked on integrating several key principles from neurobehavioral science and interaction design to build over 100 interactive applications for learning and assessments on web, mobile and desktop.

Our core capabilities:

- ★ Designing tools to convert your learning/assessment content into intuitive, interactive & intelligent applications.
- ★ Developing accurate, interactive tools to profile and simulate the behaviour and compatibility of individuals/groups.
- ★ Designing strategy and applications to promote and facilitate learning/assessment activities on social networks.

Are we right for you?

We have worked with education companies, training and recruitment companies, schools and marketing companies in India, US & Europe.

- ✓ activities, games, videos, simulations & interactive tools
- ✓ user-experience centric applications on web/mobile/desktop
- ✓ research or design innovative tools for learning/assessments
- ✗ websites, forums or static content

How do we work with you?

Based on the nature of your requirement, we usually follow a combination of these models:

Monthly Retainer Research & Development	Consultancy Fee User-experience or Project Design	Development Fee Product Design & Development	SaaS Model Joint Product Development
---	---	--	--

...and many more

Examples of projects we have worked on:

Interactive learning tools based on games, simulations, videos and activities
 ★ Psychometric & Behavioural profiling using activity based tests for recruitment, career guidance, training & performance benchmarking
 ★ Graphical Learning Management Dashboard
 ★ Text-to-animation application
 ★ Serious games and social games on web, mobile, Bluetooth servers and facebook
 ★ Non-scholastic assessment application for CCE (for CBSE Board schools)
 ★ Graphical report card management application
 ★ Virtual classroom & digital whiteboard applications ++
